I. Executive Summary

This Six-Year Capital Facilities Plan (the “plan”) has been prepared by the Lake Washington School District (the “district”). It is the organization’s primary facility planning document in compliance with the requirements of the State of Washington's Growth Management Act and King County Code 21A.43. This plan was prepared using data available in the spring of 2015.

King County was the first jurisdiction in the State of Washington to adopt a Growth Management Act school impact fee ordinance in 1991 (with fee collection first becoming effective in 1992). The King County Council adopted the ordinance, including the school impact fee formula, following a stakeholder process that included representatives from school districts and the development community. The adopted formula requires that the calculated fee be reduced by fifty percent. This discount factor was negotiated as a part of the stakeholder process. Most cities in King County (and in other areas) adopted the King County school impact fee formula, including the discount factor, in whole as a part of their school impact fee ordinances.

In order for impact fees to be collected in the unincorporated areas of King County, the King County Council must adopt this plan. The cities of Redmond, Kirkland and Sammamish have each adopted a school impact fee policy and ordinance similar to the King County model.

Pursuant to the requirements of the Growth Management Act and the local implementing ordinances, this plan will be updated on an annual basis with any changes in the fee schedule adjusted accordingly. See *Appendix B* for the current single family calculation and *Appendix C* for the current multi-family calculation.

The district’s capital facilities plan establishes a "standard of service" in order to ascertain current and future capacity. This plan reflects the current student/teacher standard of service ratio and service model for other special programs. Future state funding decisions could have an additional impact on class sizes and facility needs.

While the State Superintendent of Public Instruction establishes square foot guidelines for funding, those guidelines do not account for the local program needs in the district. The Growth Management Act and King

I. Executive Summary (*continued*)

County Code 21A.43 authorize the district to determine a standard of service based on the district's specific needs.

The district's current standard provides the following (see *Section III* for specific information):

Grade Level	Target Teacher-Student Ratio
K-1	20 Students
2-3	25 Students
4-5	27 Students
6-8	30 Students
9-12	32 Students

School capacity is based on the district standard of service and the existing inventory of available classrooms, including both permanent and relocatable (portable) classrooms. As shown in *Appendix A*, the district's overall total capacity is 27,976, including permanent capacity of 24,817 and 3,159 in relocatables. Student headcount enrollment as of October 1, 2014 was 26,492.

The district experienced actual growth of 664 students in 2014. A six-year enrollment projection, as required for this plan, is shown in *Table 1*. During the six-year window from 2014 to 2020, enrollment is projected to increase by 3,343 students to a total of 30,055. An additional 712 students are expected from 2020 to 2022. Growth is projected at all grade levels.

It is one of the fastest growing school districts in the state. The most significant growth continues to be in the Redmond area. However, growth is also occurring in Kirkland and some growth in the Sammamish area resulting in overcrowding in many district schools. The district continues to see some growth from areas in unincorporated King County.

In February 2006, voters in the Lake Washington School District passed a bond measure to fund Phase II (2006-2013) of the Major Construction School Modernization/Replacement Program. The District has completed all these projects. In addition, in February 2011, a Major Construction

I. Executive Summary (*continued*)

Capital Levy measure was approved by voters to construct additional classrooms at Redmond High School and Eastlake High School, and also build the new Nikola Tesla STEM (Science Technology Engineering and Math) High School on the east side of the district. All three of these projects are also complete.

The district presented two bond measures to voters in 2014. Both bond measures failed. The first bond measure included both projects that addressed capacity issues and also aging facilities. The second bond measure included only projects needed to address capacity issues. The need still exists and it is anticipated that, subject to voter approval, similar projects will open or be in progress during the timeframe of this plan:

- Construct three new elementary schools: one in the Redmond Ridge East development area, one somewhere in the City of Kirkland, and the other in the North Redmond area
- Build a new middle school in the Redmond Ridge area
- Replace and expand Juanita High School and also begin construction on a new secondary Science, Technology, Engineering and Math focused High School on the same campus
- Expand Lake Washington High School with an addition to accommodate growth
- Add relocatable classrooms to address capacity as needed in the district.

A financing plan is included in *Section VIII*.

II. Six-Year Enrollment Projection and Long Term Planning

Six-Year Enrollment Projection

The district developed long-term enrollment projections to assess facility capacity needs in preparation for a 2014 bond measure. Based on these projections the district expects enrollment to increase by over 3,343 students from the 2015 school year through 2020.

The district experienced actual growth of 664 students in 2014. A six-year enrollment projection, as required for this plan, is shown in *Table 1*. During the six-year window from 2014 to 2020, enrollment is projected to increase by 3,343 students resulting in a 12.5% over the current student population. Growth is expected to significantly impact all grade levels. Enrollment growth of an additional 712 students is expected through 2022.

Student enrollment projections have been developed using two methods: (1) *cohort survival* – which applies historical enrollment trends to the classes of existing students progressing through the system; and (2) *development tracking* – which projects students anticipated from new development. The cohort survival method was used to determine base enrollments. Development tracking uses information on known and anticipated housing development. This method allows the district to more accurately project student enrollment resulting of new development by school attendance area.

Cohort Survival

King County live birth data is used to predict future kindergarten enrollment. Actual King County live births through 2013 are used to project kindergarten enrollment through the 2018-2019 school year. After 2019, the number of live births is based on King County projections. Historical data is used to estimate the future number of kindergarten students that will generate from county births. For other grade levels, cohort survival trends compares students in a particular grade in one year to the same group of students in prior years. From this analysis a cohort survival trend is determined. This trend shows if the cohort of students is increasing or decreasing in size. This historical trend can then be applied to predict future enrollment.

II. Six-Year Enrollment Projection and Long Term Planning
(continued)

Development Tracking

In order to ensure the accuracy and validity of enrollment projections, a major emphasis has been placed on the collection and tracking of data of 94 known new housing developments within the district. This information is obtained from the cities and county and provides the foundation for a database of known future developments and assures the district's plan is consistent with the comprehensive plans of the local permitting jurisdictions. Contact is made with each developer annually to determine the number of homes to be built and the anticipated development schedule. Some small in-fill or short plat projects are not tracked, such activity may result in increased student population.

Student Generation Rates

Developments that are near completion, or have been completed, within the last five years are used to forecast the number of students generated by new development. District wide statistics show that each new single-family home currently generates a 0.410 elementary student, 0.128 middle school student, and 0.099 senior high student, for a total of 0.637 school-age child per single family home (see *Appendix B*). New multi-family housing units currently generate an average of 0.062 elementary student, 0.016 middle school student, and 0.014 senior high student for a total of 0.092 school age child per multi-family home (see *Appendix C*). Since 2014 the total of the student generation numbers has increased for both single-family developments and multi-family developments. These student generation factors (see *Appendix D*) are used to forecast the number of students expected from the new developments which are planned over the next six years.

III. Current District “Standard of Service”

King County Code 21A.06 refers to a “standard of service” that each school district must establish in order to ascertain its overall capacity. The standard of service identifies the program year, the class size, the number of classrooms, students and programs of special need, and other factors determined by the district, which would best serve the student population. Relocatables (i.e. portable classroom units) may be included in the capacity calculation using the same standards of service as permanent facilities.

The standard of service outlined below reflects only those programs and educational opportunities provided to students that directly affect the capacity of the school buildings. The special programs listed below require classroom space; reducing the total permanent capacity of the buildings housing these programs. Newer buildings have been constructed to accommodate some of these programs. Older buildings require additional reduction of capacity to accommodate these programs. At both the elementary and secondary levels, the district considers the ability of students to attend neighborhood schools to be a component of the standard of service.

The standard of service changed slightly in the 2012-2013 school year to reflect the change in the school configuration model from K-6, 7-9 and 10-12 to a K-5, 6-8, 9-12 model. The standard of service will remain almost the same in the 2015-2016 school year.

The district’s standard of service, for capital planning purposes and the projects identified in this plan, includes space needed to serve all students in All Day Kindergarten. In 2009, the State legislature established a schedule to fully fund All Day Kindergarten by 2017. Due to space limitations, the district’s current standard of service is to provide one All Day Kindergarten classroom per school and provide additional All Day Kindergarten classrooms based on space available and demand for the fee based program. Currently, 68% of students participate in the All Day Kindergarten program.

III. Current District "Standard of Service" (continued)

Standard of Service for Elementary Students

School capacity at elementary schools is calculated on an average class size in grades K-5 of 24; based on the following student/teacher staffing ratios:

- Grades K - 1 @ 20:1
- Grades 2 - 3 @ 25:1
- Grades 4-5 @ 27:1

The elementary standard of service model also includes:

- Special Education for students with disabilities which may be provided in a self-contained classroom
- Music instruction provided in a separate classroom
- Computer Lab
- Art/Science room in modernized schools

Identified students will also be provided other educational opportunities in classrooms designated as follows:

- Resource rooms
 - District remediation programs
 - Learning assisted programs
 - Special Education
- English Language Learners (ELL)
- Preschool
- Gifted education (pull-out Quest programs)

Standard of Service for Secondary Students

School capacity at secondary school is based on the follow class size provisions:

- Class size for grades 6-8 should not exceed 30 students
- Class size for grades 9-12 should not exceed 32 students

III. Current District “Standard of Service” (continued)

In the secondary standard of service model:

- Special Education for students with disabilities may be provided in a self-contained classroom

Identified students will also be provided other special educational opportunities in classrooms designated as follows:

- Resource rooms
- English Language Learners (ELL)

Room Utilization at Secondary Schools

It is not possible to achieve 100% utilization of regular teaching stations at secondary schools due to scheduling conflicts for student programs, the need for specialized rooms for certain programs, and the need for teachers to have a work space during their planning periods. The district has determined a standard utilization rate of 70% for non-modernized secondary schools. For secondary schools that have been modernized, the standard utilization rate is 83%. The anticipated design of the modernized schools and schools to be constructed will incorporate features which will increase the utilization of secondary schools.

IV. Inventory and Evaluation of Current Facilities

The district has total classrooms of 1,391, including 1,253 permanent classrooms and 138 relocatable classrooms (see *Appendix A-1*). These classrooms represent a theoretical capacity to serve 32,501 if all classrooms were only used as general classroom spaces. However, the district's standard of service provides for the use of classrooms for special programs, such as special education, English Language Learners and safety net programs. These programs serve students at much lower student to teacher ratios than general education classrooms, or serve the same students for a portion of the day when they are pulled out of the regular classroom.

As a result, the real capacity of these school buildings is significantly lower. A total of 215 classroom spaces are used for special programs as shown in *Appendix A-2*. The remaining classrooms establish the net available capacity for general education purposes and represent the district's ability to house projected student enrollment based on the Standard of Service defined in Section III, Current District Standard of Service.

After providing space for special programs the district has a net available classroom capacity to serve 27,976 students. This includes 24,385 in permanent regular education capacity, 432 for self-contained program capacity and 3,159 in portable (relocatable) capacity.

The school configuration change that was implemented in 2012-2013 provided some relief to the capacity issues faced at the elementary level at that time. Without this change the district would have needed to construct four elementary schools in addition to those needed as a result of current enrollment projections.

Enrollment is expected to increase to 30,055 in 2020 (see *Table 1*).

The physical condition of the district's facilities is documented in the 2013 State Study and Survey of School Facilities completed in accordance with WAC 180-25-025. As schools are modernized or replaced, the State Study and Survey of School Facilities report is updated. That report is incorporated herein by reference. In addition every district facility is annually evaluated as to condition in accordance with the State Asset Preservation Program.

V. Six-Year Planning and Construction Plan

Enrollment projections show that enrollment will increase at all grade spans. Based on the enrollment projections contained in *Table 5*, student enrollment is anticipated to reach 30,055 by 2020. The district current inventory of existing permanent capacity is 24,817. As a result student enrollment will exceed permanent capacity by 5,238 students in 2020.

To address existing and future capacity needs, the district contemplates using the following strategies:

- Construction of new schools
- Additions/expansion of existing high schools
- Modernization/replacement of older schools with increased capacity as needed
- Use of relocatables
- School feeder boundary adjustments
- Closing schools to out-of-attendance area variances

Construction of new capacity in one area of the district could indirectly create available capacity at existing schools in other areas of the district through area specific boundary adjustments. Future updates to this plan will include specific information regarding adopted strategies.

Strategies to address capacity needs employed over the prior six year planning timeline (2009-2014) include:

- Additional portables were placed at Rosa Parks Elementary School located within the Redmond Ridge development, which opened in the fall of 2006. The growth in the Redmond Ridge and Redmond Ridge East areas has resulted in the need to place ten (10) portables at the school over the last six years.

V. Six-Year Planning and Construction Plan (*continued*)

- Phase II School Modernization (2006-2013) was funded by the voters in February 2006. The approved bond measure funded the modernization/replacement of 11 schools throughout the district. School modernization/replacement projects included the addition of new student permanent capacity, as needed. The Phase II School Modernization projects included:
 - Frost Elementary School opened in the fall of 2009
 - Lake Washington High School and Finn Hill Middle School opened in the fall of 2011
 - Muir, Sandburg, and, Keller Elementary Schools opened in the fall of 2012
 - Bell, Rush, and Community Elementary Schools; Rose Hill Middle School; and International Community School opened in the fall 2013
- Additional classrooms were built at Redmond and Eastlake High Schools, and a new Science, Technology, Engineering and Math (STEM) high school (Nikola Tesla STEM High School) was built on the east side of the District. The additions opened in the fall of 2012. The STEM school was opened in 2012.
- Three boundary adjustments were completed: (1) Due to overcrowding at Rosa Parks Elementary in Redmond Ridge, a temporary boundary adjustment was made to reassign some students from Redmond Ridge East to Wilder Elementary; (2) Because of overcrowding at Einstein and Rockwell Elementary Schools a temporary boundary adjustment was conducted to move unoccupied new developments from those schools to Mann Elementary; and, (3) District-wide boundary adjustments were identified in 2014 for implementation in the fall of 2015
- Four additional relocatables were added to Mann Elementary and to Wilder Elementary in the summer of 2014 to accommodate additional students.
- Twenty-two relocatable classrooms will be added at various locations in the summer of 2015 (as identified in *Section VI*) to help relieve capacity issues. Eight additional portables are planned to be added in 2016 to accommodate enrollment growth.

V. Six-Year Planning and Construction Plan (*continued*)

Based on the student enrollment and facility capacity outlined in *Table 5*, the district contemplates the need for multiple growth projects within the period of this plan including:

- Three new elementary schools (one in the Redmond Ridge East, one in North Redmond and one in Kirkland)
- A new middle school in the Redmond area
- Expansion of Lake Washington High School
- A new Science Technology Engineering and Math focused secondary school on the west side of the district
- Rebuilding and expansion of Juanita High School

The rebuilding and expansion of Juanita High School, as well as the addition of a new Science Technology Engineering and Math focused secondary school are anticipated to be under construction, but not completed during the six year window of this plan.

Completed projects, as shown in *Table 5*, would result in student enrollment exceeding permanent capacity by 1,340 students in 2020. Many district sites are either at or close to maximum relocatable placement.. However, the District would use relocatable capacity to address remaining capacity needs if sites are able to accommodate additional relocatables.

VI. Relocatable and Transitional Classrooms

The district facility inventory includes 138 relocatables (i.e. portable classroom units) that provide standard capacity and special program space as outlined in *Section III* (see *Appendix A*).

Relocatable classrooms have been used to address capacity needs in the following schools:

- In 2009, four relocatable classrooms were added to Rosa Parks Elementary School in the Redmond Ridge Development
- In 2010, relocatable classrooms were added to district schools in Redmond and unincorporated King County
 - *Redmond area*: Rockwell Elementary School – two classrooms, and Einstein Elementary School – one classroom
 - *Unincorporated King County area*: Rosa Parks Elementary School – four classrooms
- In 2011, the district placed relocatable classrooms at school sites in Kirkland, Redmond and unincorporated King County:
 - *Kirkland area*: Lakeview Elementary School – two classrooms, and Rose Hill Elementary School two classrooms
 - *Redmond area*: Rockwell Elementary School – one classroom and Redmond Middle School - four classrooms
 - *Unincorporated King County area*: Rosa Parks Elementary School – two classrooms
- In 2012, the district placed four relocatable classrooms at Redmond High School. In addition, because of capacity issues, Northstar Middle School moved from Lake Washington High School into relocatables units at Emerson High School and Renaissance Middle School moved from Eastlake High School into relocatables classrooms on the same campus.
- In 2013, four relocatable classrooms were added to Redmond High School to support special education program space needs and two additional relocatable classrooms were placed at Redmond Middle School.
- In 2014 the district placed an additional ten relocatable classrooms needed as a result of enrollment growth. Four relocatables were placed at Mann Elementary School in Redmond and two at

VI. Relocatable and Transitional Classrooms

- Redmond Elementary School. Four relocatables were placed at Wilder Elementary School.
- In 2015 the district will add twenty-two portables to address enrollment growth. These will be placed at various schools throughout the district.
 - The district also plans to add another eight portables in 2016

Within the six-year planning window of this plan, projections indicate that other relocatables may be needed in all four jurisdictions (Sammamish, Redmond, Kirkland and unincorporated King County).

For a definition of relocatables and permanent facilities, see *Section 2 of King County Code 21A.06*. As schools are modernized/replaced, permanent capacity will be added to replace portables currently on school sites to the extent that enrollment projections for those schools indicate a demand for long-term permanent capacity (see *Table 5*).

As enrollment fluctuates, relocatables provide flexibility to accommodate immediate needs and interim housing. Because of this, new school and modernized school sites are planned for the potential of adding up to four portables to accommodate the changes in demographics. The use and need for relocatable classrooms will be balanced against program needs.

VII. Six-Year Classroom Capacities: Availability / Deficit Projection

Based on the six-year plan, there will be insufficient total capacity to house anticipated enrollment (see *Table 5*). As demonstrated in *Appendix A*, the district currently has permanent capacity (classroom and special education) to serve 11,201 students at the elementary level, 6,050 students at the middle school level, and 7,134 students at the high school level. Current enrollment at each grade level is identified in *Appendix A*. As depicted in *Table 5*, the district currently has insufficient permanent capacity and will continue to have insufficient permanent capacity due to growth through 2020. To the extent possible, relocatable facilities will continue to be used to address capacity needs that cannot be served by permanent capacity. However many district sites are either at or close to maximum relocatable placement.

Differing growth patterns throughout the district may cause some communities to experience overcrowding. This is especially true in the eastern portions of the district where significant housing development has taken place. Following the recent slow economy, there are continued signs of recovery, particularly in housing starts, and growth and the number of developments under construction continues to increase. The continued development of Redmond Ridge East, northwest Redmond, the Sammamish Plateau and also the in-fill, short plats and other development in Kirkland, will put pressure on schools in those areas.

VIII. Impact Fees and the Finance Plan

The school impact fee formula calculates a proportionate share of the costs of system improvements that are reasonably related to new development. The formula multiplies the per student costs of site acquisition and construction costs for new capacity projects by a student generation rate to identify the share per dwelling unit share of the facilities that are needed to serve new growth. (The student generation rate is the average number of students generated by dwelling unit type - new single family and multi-family dwelling units.) The formula then provides a credit against the calculated costs per dwelling unit for any School Construction Assistance Program funding that the District expects to receive for a new capacity project from the State of Washington and for the estimated taxes that a new homeowner will pay toward the debt service on school construction bonds. The calculated fee (see *Appendix B* and *Appendix C*) is then discounted, as required by ordinance, by fifty percent.

For the purposes of this plan and the impact fee calculations, the actual construction cost data from Sandburg Elementary School, opened in 2012; Rose Hill Middle School, opened in 2013; and Lake Washington High School, opened in 2011 have been used (see *Appendix E*).

The finance plan shown on *Table 6* demonstrates how the Lake Washington School District plans to finance improvements for the years 2015 through 2020. The financing components include secured and unsecured funding. The plan is based on future bond approval, securing state construction funding assistance and collection of impact fees under the State's Growth Management Act, and voluntary mitigation fees paid pursuant to Washington State's Environmental Policy Act.

<i>Capacity</i>		
<i>Adjustment</i>		
2012 construction cost	\$45,325 per student space (based on 2012 construction costs, \$40,793,000 / 900 students)	
2017 projected cost, no capacity difference	\$52,545 per student space (based on 2017 projected costs, \$47,290,267 / 900 students)	\$52,545 per student space x 900 students = \$48,708,975 (based on 2017 projected costs)
<i>Cost</i>		
<i>Adjustment</i>		
Construction Cost (bid 2012)	\$40,793,000	
Projected Construction Cost in 2017 @ 900 student capacity		\$47,290,267

	<i>Lake Washington High School</i>	<i>Future High School</i>
	<i>1,567 student capacity</i>	<i>1,400 student capacity</i>
<i>Cost</i>		
Construction Cost 2009	\$61,000,000	
Projected Construction Cost in 2018 @ 3% per year	\$79,591,164	
<i>Size Comparison</i>		
	1,567 (59 classrooms x 32 students per classroom = 1,888 x .83 utilization factor = 1,567 students)	1,400 (53 classrooms x 32 students per classroom = 1,696 x .83 utilization factor = 1,400 students)
<i>Capacity Adjustment</i>		
2009 construction cost	\$38,928 per student space (based on 2009 construction costs, \$61,000,000 / 1,567 students)	
2018 projected cost, adjusted for capacity difference	\$50,792 per student space (based on 2018 projected costs, \$79,591,164 / 1,567 students)	\$50,792 per student space x 1,400 students = \$71,108,889 (based on 2018 projected costs)
<i>Cost Adjustment</i>		
Construction Cost 2009	\$61,000,000	
Projected Construction Cost in 2018 @ 1,400 student capacity		\$71,108,889

* Number of Individual Students (10/1/14 Headcount).

** County Live Births estimated based on OFM projections. 2018 and prior year birth rates are actual births 5 years prior to enrollment year.

*** Kindergarten enrollment is calculated at 7.99% of County Live Births plus anticipated developments.

**** First Grade enrollment is based on District's past history of first grade enrollment to prior year kindergarten enrollment.

Footnotes

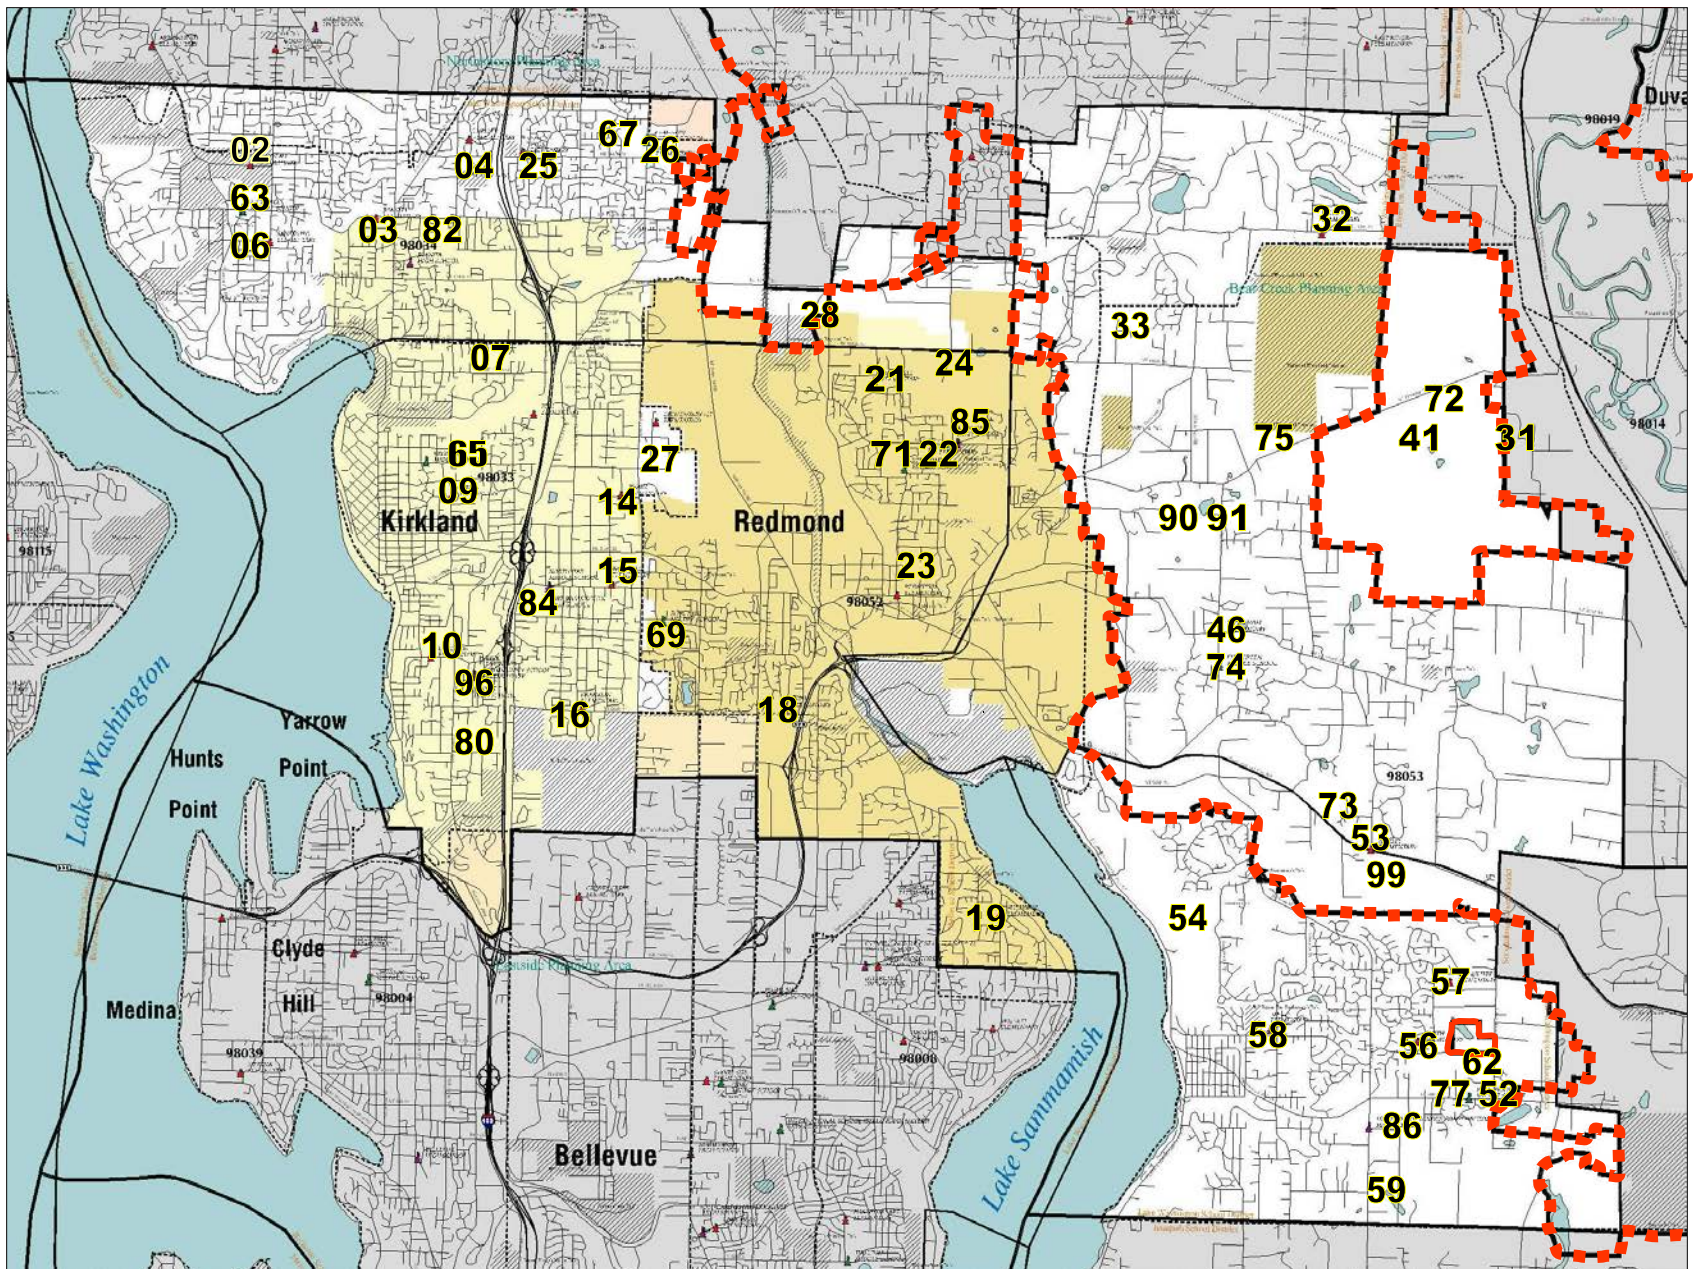

“*” = See Table 4a for a District map. Locations indicated by numbers stated in this column.

“***” = “In reserve” refers to sites owned by the District. While the District does not anticipate construction school facilities on these sites within these six years, they are being held for the District’s long term needs.

“*****” = Property unable to be used for a school site due to the King County School Siting Task Force recommendations as adopted by the King County Council.

The King County Rural Area Task Force concluded:

1. "Lake Washington 2" (Site 75): 37.85 acre site located on the north side of Novelty Hill Road & adjacent to south boundary of Redmond Ridge. The District must work with King County to find an alternative site within the UGA. If an alternative site cannot be feasibly located, the District can use the site for a "small [5 acre] environmental school while placing the remainder of the use into permanent conservation."
2. "Lake Washington 4": Existing undeveloped acreage at Dickinson/Evergreen site - this acreage be used for school development and can connect to sewer.
3. "Lake Washington 1 (Site 33)": 19.97 acres located 1/4 mile east of Avondale Road - *no school use allowed*; potential conservation value.
4. "Lake Washington 3" (Site 90): 26.86 acres located 1/4 mile south of Novelty Hill Road and 1/2 mile east of Redmond City Limits - *no school use allowed*.

Projected Capacity to House Students

	2014	2015	2016	2017	2018	2019	2020
Permanent Capacity	24,817						
New Construction*:							
Redmond Ridge East Elementary #31					550		
New Elementary #28 (Pope Property)					550
