

AFFIDAVIT OF EMERGENCY REPAIR FOR NON-ESSENTIAL CONSTRUCTION

BACKGROUND

In response to the [Governor's Executive Order No. 20-25](#) issued on March 23, 2020, with a formal [Guidance Memorandum](#) issued on March 25, 2020, and with further press conference clarification provided at approximately 11:50 am on March 26, 2020, **all non-essential construction in the City of Sammamish (City) has been ordered to cease for the duration of the order by the Washington State Governor's Office.**

EMERGENCY REPAIRS ALLOWED

Although construction must be halted, emergency repairs to non-essential commercial and residential structures are allowed to continue and may be permitted, constructed, and inspected by the Governor's Order (see Item C in Guidance Memorandum issued on March 25, 2020).

This affidavit form collects essential information and documentation of the property owner's declaration that any proposed emergency construction activity associated with a non-essential structure is limited to that allowed under the Governor's Order.

The City will continue to accept requests for and will undertake inspections on emergency construction projects when the applicant has adequately declared the project fits within the Order's allowance for emergency repairs.

Applications for inspection will not be accepted when this form is deemed to be incomplete or when the project is not classified as an emergency.

Submittal Instructions

Complete & save this form before uploading it to MyBuildingPermit.com.
