

AFFIDAVIT OF CONSTRUCTION SITE CLOSURE FOR SAFETY, EROSION CONTROL & DRAINAGE

BACKGROUND

In response to the [Governor's Executive Order No. 20-25](#) issued on March 23, 2020, with a formal [Guidance Memorandum](#) issued on March 25, 2020, and with further press conference clarification provided at approximately 11:50 am on March 26, 2020, **all non-essential construction in the City of Sammamish (City) has been ordered to cease for the duration of the order by the Washington State Governor's Office.**

CLOSURE OF CONSTRUCTION SITES

The City recognizes that when the Governor's Order was passed, there were many active construction projects underway within the City.

To ensure public safety, protect the welfare of the community, and assist in guarding against degradation of the environment, the City must allow for the winding down of construction and allowing property owners and project contractors to properly prepare sites for a duration of dormancy.

Although construction must be halted, reasonable measures to properly shut down and close construction sites are allowed by the Governor's Order (see Item C in Guidance Memo issued on March 25, 2020).

This affidavit form collects essential information and documentation of the property owner's proclamation that any continued construction activity is the minimum necessary to properly prepare the site for a duration of dormancy and close down the construction site.

The City will continue to accept request for and undertake inspections on reasonably acceptable actions to properly close and prepare construction sites for a duration of dormancy or to address public safety concerns (as determined by the individual contactor and/or property owner).
