The Consultant's performance under the Contract will be monitored and reviewed by a Contract Administrator appointed by the City Manager. Reports and data required to be provided by the Consultant shall be delivered to the Contract Administrator. Questions by the Consultant regarding interpretation of the terms, provisions, and requirements of the Contract shall be addressed to the Contract Administrator.

3.02 Scope of Work

The Consultant who is ultimately selected will provide services including, but not necessarily limited to, the following:

1. DEI Program Assessment:

In conjunction with designated city staff, evaluate the City's culture using a combination of one on one interviews and or surveys to assess employee and management abilities in the areas of DEI. Evaluate opportunities and challenges using this assessment and use it as the basis to develop program and training recommendations.

Data Analysis

Provide aid in reviewing and interpreting available demographic data for the City in relation to our workforce and communities we serve. Review data on services provided by the City to understand whether the City appropriately serves and regulates our citizens, businesses and visitors. Recommend additional data that could be developed to inform City practices moving forward.

Policy Review

Review existing City-wide and Departmental-specific policies and procedures with a DEI lens and make recommendations for updates or creation of new ones. Review community and elected official involvement in and participation in City activities and make recommendations to ensure City activities align with community goals. Review City housing and employment data and City land use policies to recommend policy options to create a diverse, vibrant community.

Recommendations

Development of recommendation(s) for a comprehensive DEI program for the City, which we expect to include components of in-person and online training for all staff and elected officials. The City also seeks recommendations for training opportunities for the City's commissions.

Recommendations should address how to build stakeholder and community engagement processes into our work and ensure that each of our steps and actions include an element of capacity building. Other components to include:

- Conduct outreach to and communication with key community partners on issues related to diversity, equity and inclusion (DEI). Communicate findings both positive and negative, and need for adjustments to approach and operations, to citizens.
- Recommend any external citizen/community-oriented DEI activities needed to complement and enhance the City work.
- Advise on the potential of future formation of a Diversity Advisory Council (DAC), which would be appointed by City Council, and consist of community members, and city staff. The DAC would work to meet the diversity and human rights goals established by City Council and the needs of the City, both as a municipality and as a community.
- The Consultant would provide the first sessions of training for City staff with a goal of training internal employees to conduct future session.

Program Structure

We expect the proposed program to address, at a minimum, the following elements:

- DEI lenses addressing socioeconomic status, implicit bias, micro-aggressions, ability, physical differences, gender, LGBTQIA, race, language, ethnicity, and religion;
- City-wide housing, transportation and economic issues/policies influencing community diversity and access to City services;
- Identification of internal systems to support integration and continued growth of DEI culture within the City post-training.
- Development and implementation of strategies to increase workforce and advisory committee diversity (e.g. recruitment and interviewing processes, retention strategies, professional development, etc.). Development of internal programs and external communication strategies to inform diverse populations of the City's activities and invite them to participate.

Integration

Recommendations and/or suggestions on ways to integrate and expand the program into one that is outward facing and addressing the DEI needs of our patrons, community partners and the diverse populations we serve.

Aim to build stakeholder and community engagement processes into the work and ensure that each of our steps and actions include an element of capacity building.

Evaluation

Recommendations and implementation of methods to evaluate program success, including post-training cultural survey and final report on project. Recommendations on steps needed to ensure the program is a part of City culture for the long term.

2. Equity Audit

The DEI audit would include a review of existing documents regarding program information and evaluation, member surveys, human resource policies and procedures, marketing materials, the City website, and other pertinent documents in order to develop a more comprehensive picture of the organizational climate in relation to its goal of equity. Included in the audit will be a review of policies and activities of other cities and municipalities.

Once material is collected and analyzed, the consultants will prepare a detailed summary report, including but not limited to an analysis outlining key themes, recommendations for incorporating action steps into administrative and programmatic areas, and a compilation of equity programs of similar organizations.

This work may be completed before or during the DEI program development, as recommended by the consultant.

Audit elements are expected to include, at a minimum:

- Assessments of programs, policies, structures, practices, and culture resulting in qualitative and quantitative data regarding the current work and workplace of the City, as well as stakeholder perspectives and expectations for future organizational culture change in relation to equity programming and practice.
- A comprehensive written report of the audit detailing its process, key themes, analysis of the gaps and disconnects between the current and future/desired state of the organization, and opportunities to build upon. The report should include recommendations for embedding inclusive policies and practices into the organization's culture and into all function areas (as noted earlier) of the City, including achievable short-term action steps and sustainable, long-term goals.
- A field scan of complementary efforts done by other cities and municipalities.
